FARR 400 wins awards from two sailing magazines

10 January 2012

The FARR 400 carbon composite one-design racing yacht designed by FARR Yacht Design and built by Premier Composite Technologies has won awards from two sailing magazines.

These are:

- o [Sailing World](#) magazine's 2012 Boat of the Year: Best Offshore One-Design Award; and
- o [Sail Magazine](#)'s Best Boats 2012: Best Performance 30 ft and Over Award.

"The Sailing World Boat of the Year award is renowned in the American market for choosing boats that are designed and built with serious racing in mind and this was exactly our objective in building the new FARR 400," says Hannes Waimer, MD, [Premier Composite Technologies](#).

The FARR 400 will be on display at the [Boot Düsseldorf](#) boat show on 21-29 January 2012.
